Volume 461

March 31, 1986

**FIRST ASPEN WINTER PHYSICS
CONFERENCE^a**

Editor

MARTIN M. BLOCK

Scientific Advisory Committee

J. BALLAM, G. CASSIDAY, D. CLINE, J. CRONIN, P. DARRIULAT,
M. L. GOLDBERGER, C. QUIGG, H. SCHOPPER, R. SCHWITTERS,
F. SCIULLI, and P. SÖDING

Organizing Committee

M. M. BLOCK, L. DURAND, S. MESHKOV, D. PINES, M. RUDERMAN,
D. SCHRAMM, L. M. SIMMONS, and F. ZACHARIASEN

CONTENTS

Introductory Remarks. <i>By</i> MARTIN M. BLOCK	ix
Part I. Collider Physics at Ultrahigh Energies	
Experimental Future: Some Sociological Comments on High Energy Physics. <i>By</i> LEON M. LEDERMAN	1
High p_T Jets from $\bar{p}p$ Collisions at $\sqrt{s} = 540$ GeV in UA2. <i>Presented by</i> JOHN RENNER HANSEN	13
The Phenomenology of High Energy Multijets in Hadron-Hadron Collisions. <i>By</i> R. D. FIELD	38
CDF at Fermilab: A Progress Report. <i>By</i> A. V. TOLLESTRUP	56
The DØ Detector at the Tevatron Collider. <i>By</i> MARIS A. ABOLINS	63
The Top Quark. <i>By</i> V. BARGER	83
W^+ and Z^0 Production in the UA1 Experiment at the CERN Proton-Antiproton Collider. <i>Presented by</i> V. VUILLEMIN	99
Production of High Mass $e\nu$ and e^+e^+ Pairs in the UA2 Experiment at the CERN $\bar{p}p$ Collider. <i>Presented by</i> JOHN RENNER HANSEN	125

^aThe papers in this volume were presented at the First Aspen Winter Physics Conference Series, which was held at the Aspen Center for Physics in Aspen, Colorado, on January 6–19, 1985.

Heavy Quark Production at the CERN Proton-Antiproton Collider. <i>Presented by ANNE KERNAN</i>	141
Physics at the Tevatron Collider. <i>By G. BELLETTINI</i>	161
A Review of σ_{tot} , ρ , and B for $p\bar{p}$ and pp Elastic Scattering. <i>By M. M. BLOCK</i>	186
Results from the UA4 Experiment on Total Cross Section and Elastic Scattering at the CERN SPS Collider. <i>By G. MATTHIAE</i>	204
Multiplicities in High Energy Interactions. <i>By M. DERRICK</i>	213
Total Cross Sections at Ultrahigh Energy from Cosmic Ray Experiments. <i>By G. B. YODH</i>	239
Cross Sections in the Multi-TeV Range. <i>By T. K. GAISSER and F. HALZEN</i>	260
Comments on Monojets and Other Anomalous Events. <i>By G. L. KANE</i>	269
Experimental Observation of Events with Large Missing Transverse Energy. <i>By MOHAMMAD MOHAMMADI</i>	289
Exotic Events in UA2. <i>Presented by JOHN RENNER HANSEN</i>	314
Supergravity and Superstrings. <i>By MURRAY GELL-MANN</i>	325
Some Comments on SSC Physics. <i>By IAN HINCHLIFFE</i>	336
Detector Problems at the SSC. <i>By STANLEY G. WOJCICKI</i>	351

Part II. Electroweak Interactions

The Standard Model and Beyond. <i>By WILLIAM J. MARCIANO</i>	367
A Selective Experimental Review of the Standard Model. <i>By E. D. BLOOM</i>	384
Brief Review of Neutrino Physics. <i>By FRANK SCIULLI</i>	415
Constraints on Particle Physics from Cosmology. <i>By DAVID N. SCHRAMM and JANE C. CHARLTON</i>	431
The LEP Program. <i>By JAMES V. ALLABY</i>	447
The SLC Program. <i>By CHARLES Y. PRESCOTT</i>	476
High Energy Electroweak Parameters and Experimental Data from $p\bar{p}$ Collider Runs. <i>By DAVID B. CLINE</i>	487
Precision Measurements of the Electroweak Mixing-Angle. <i>By J. PANMAN</i>	503
Radiative Corrections in the $SU(2)_L \times U(1)$ Theory. <i>By A. SIRLIN</i>	521
Charm and Heavy Flavor Lifetimes. <i>By W. T. FORD</i>	529
Rare ψ Decays. <i>By RICHARD PARTRIDGE</i>	546
Measurements of Neutrino Mass. <i>By R. G. H. ROBERTSON</i>	564
Status of Double Beta Decay. <i>By MICHAEL S. WITHERELL</i>	577
Neutrino Oscillation Studies with Reactor Antineutrinos. <i>By P. VOGEL</i>	582
Free Neutron-Antineutron Oscillations. <i>By SERGIO P. RATTI</i>	590
Experimental Status of Proton Decay. <i>By J. C. VAN DER VELDE</i>	615
Monopoles, Cosmology, and Astrophysics—Update 1985. <i>By MICHAEL S. TURNER</i>	639
The Status of Searches for Magnetic Monopoles. <i>By H. J. FRISCH</i>	652

Production of W and Z in the UA2 Experiment at the CERN $\bar{p}p$ Collider. <i>Presented by</i> CLAUDIO CONTA	666
Electron-Positron Electroweak Experiments. <i>By</i> P. SÖDING	677
Physics at HERA. <i>By</i> GÜNTER WOLF	699
CP Nonconservation. <i>By</i> PAUL LANGACKER	725
Index of Contributors	749

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of The Academy. The Academy has no intent to influence legislation by providing such forums.
